

# **SIP-adus Update**

**Takahiko Uchimura**

**SIP-adus International Cooperation Working Group**

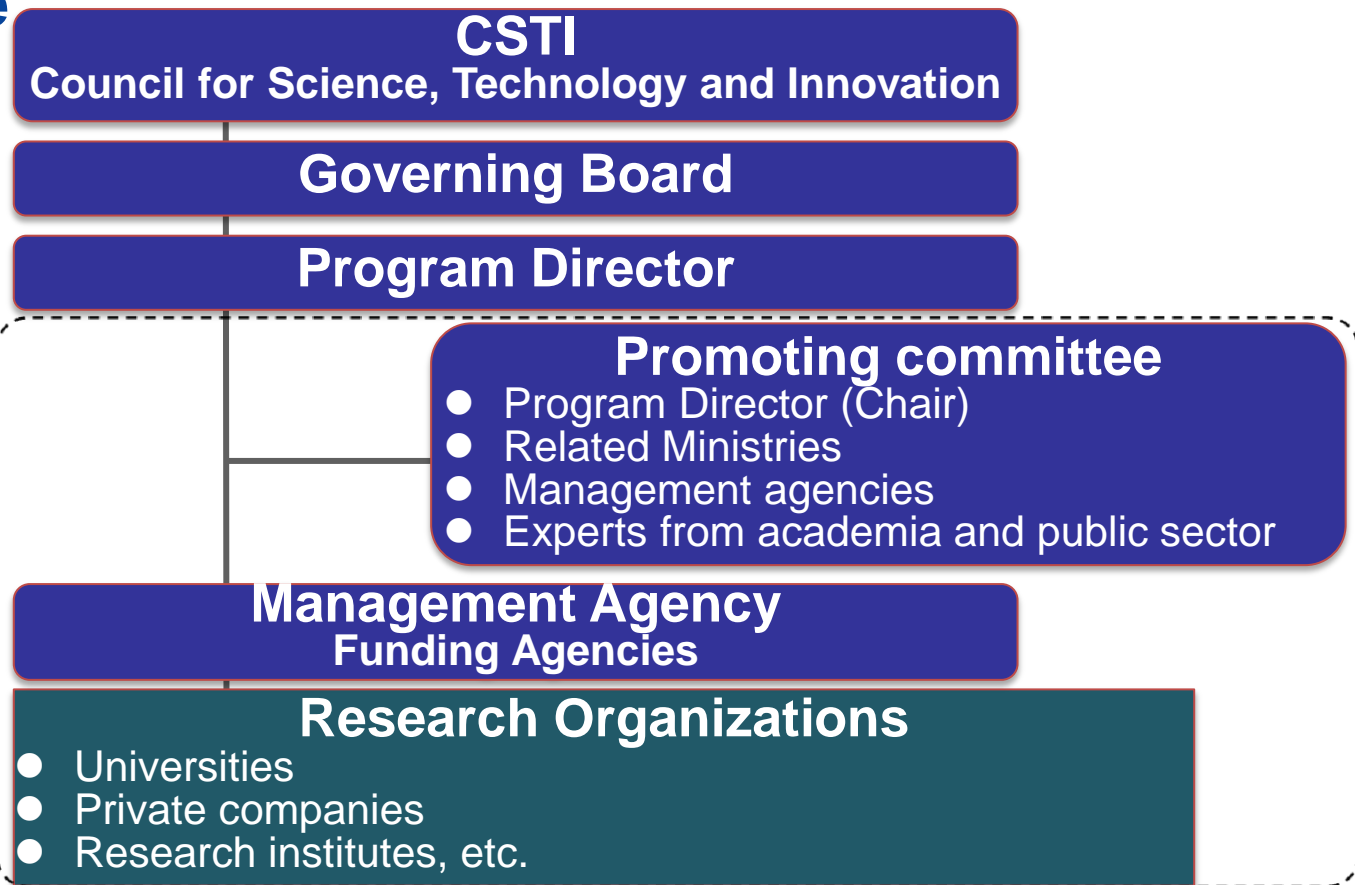

**October 29, 2017**

# Contents

- ◆ SIP, SIP-adus
- ◆ Development Structure
- ◆ Government Structure
- ◆ Technologies for Automated Driving
- ◆ Development Focus Areas
- ◆ FOT from FY2017
- ◆ International Cooperation
- ◆ SIP-adus Workshop

## ◆ SIP Structure

Cross-ministerial Strategic Innovation Promotion Program

**11 Programs**

## ◆ SIP

- Cross-Ministerial **S**trategic **I**nnovation Promotion **P**rogram

# “SIP- adus”

## - Mobility Bringing Everyone a Smile -

- Innovation of **A**utomated **D**riving for **U**niversal **S**ervices

*SIP-adus*

*Innovation of Automated Driving for Universal Services*

## ◆ Three WGs under SIP-adus

### Promoting Committee

Large Scale  
FOT TF

#### System Implementation WG

- ◆ Technology development

#### Next Generation Urban Transportation WG

- ◆ Development and Deployment  
of NGUT

#### International Cooperation WG

- ◆ Communication and Cooperation
- ◆ Social acceptance

Dynamic Map  
Structuring TF

HMI TF

## ◆ Governments under SIP-adus Project

**Cabinet Secretariat**  
IT Strategic Headquarters

**Cabinet Office**  
Council for Science,  
Technology and Innovation

**National Police  
Agency  
(NPA)**

**Road Traffic Safety**

**Ministry of Internal  
Affairs and  
Communications  
(MIC)**

**Communication  
Technology**

**Ministry of  
Economy, Trade  
and Industry  
(METI)**

**Economy and  
Industry**

**Ministry of Land,  
Infrastructure,  
Transportation and  
Tourism  
(MLIT)**

**Road Bureau  
Road and  
Infrastructure**

**Road  
Transport Bureau  
Standards**

## ◆ R&D in Cooperative area with Industry, Academia and Government

**Basic Tech.** Security, Simulation, Database, etc.

In red : Area of Cooperation ⇒ Main Area of SIP-adus

## ◆ 20 to 30 projects per year

### Promoting Committee

System Implementation WG

Next Generation Urban Transportation WG

International Cooperation WG

### ■ Budget ¥100/\$

- FY 2014 : \$25 M
- FY 2015 : \$23 M
- FY 2016 : \$26 M
- FY 2017 : \$33 M

### SIP-adus's Project (FY2016)

---

Dynamic Map

Surveys and Investigationsfor Prototyping and Evaluation Toward Construction of a Dynamic Map [PDF](#)

Surveying and investigation toward development of a common platform for dynamic maps [PDF](#)

Construction of thetraffic regulation information management system for realization automated drive [PDF](#)

Investigation into the International Standardization of Dynamic Map and Overseas Trends [PDF](#)

Survey on utilization of satellite positioning information for realization of automated driving system [PDF](#)

Study and consideration to construct the "Dynamic Map Service Platform" [PDF](#)

---

Connected Vehicle

Establishmentof technology for providing traffic signal information towards the realization of automated driving [PDF](#)

Establishment of technology for providing vehicle/pedestriandetection information towards the realization of automated driving [PDF](#)

Creation of an internationally open research and development environment [PDF](#)

Development of V2V, V2I Communication Technology Toward the Automated Driving Systems [PDF](#)

Task II Development of Vehicle-to-pedestrian Communicatio+F1n Technology [PDF](#)

Development of Infrastructure Radar System Technology [PDF](#)

Next-Generation Intelligent Transport Systems (ITS) utilizing Information and Communication Technology (ICT) [PDF](#)

---

Human Factors

Human Factors and HMI Research for Automated Driving [PDF](#)

---

Impact Assessment

Study on analytical methodology to estimate the effect of automated driving technology on reduced number of traffic accident fatalities in order to achieve the government target [PDF](#)

Development and substantiation of simulation technology for estimation of traffic accident reduction detailed effects. (Strategic Innovation Promotion Program:Automated driving system) [PDF](#)

## ◆ Development to FOT

FY2014

FY2015

FY2016

FY2017

FY2018

- ◆ Development Structure
- ◆ R & D Themes

Promoting Committee

System Implementation WG

Next Generation Transport WG

International Cooperation WG

- ◆ Integrated into five major Topics

1. Dynamic Map

2. Cyber Security

3. HMI

4. Pedestrian Accident Reduction

5. Next Generation Transport

- ◆ Large Scale Field Operational Test

Enhance Research and Technology Development

Evaluate from various viewpoints

Evaluate practical use

International cooperation and harmonization

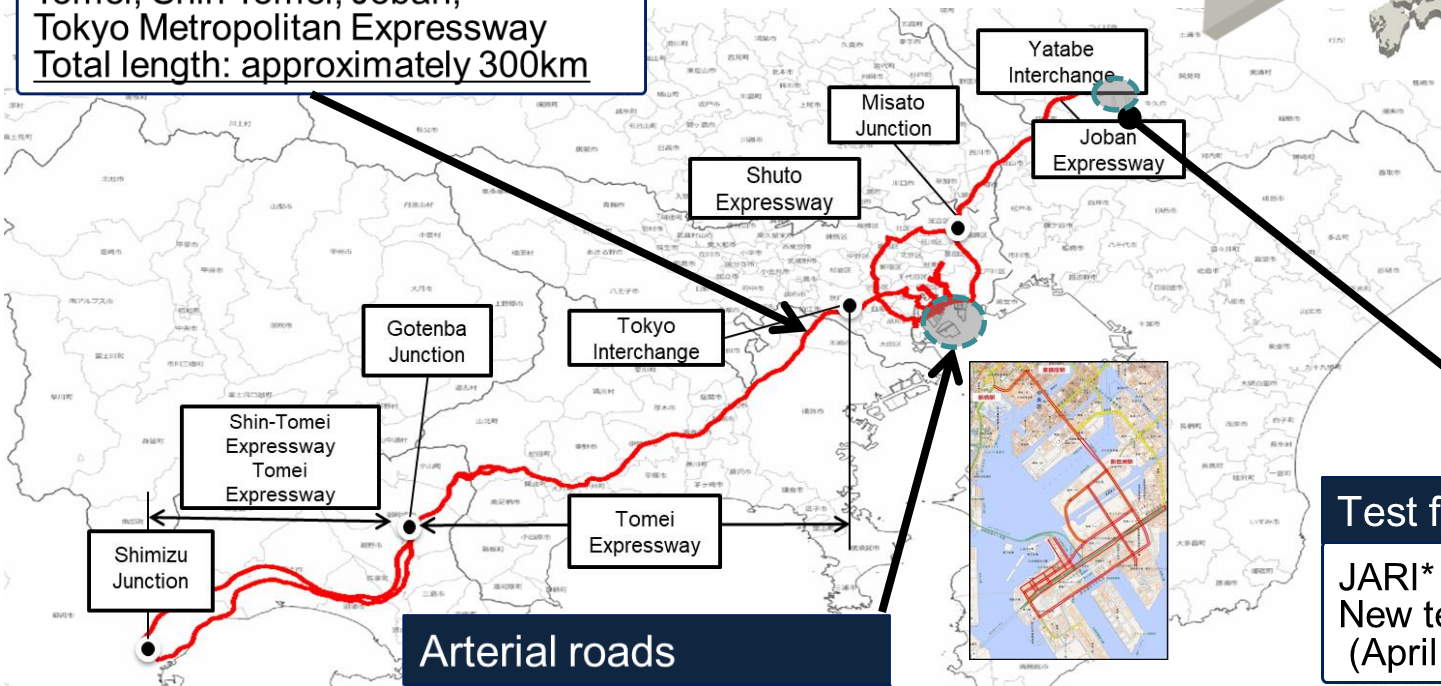

Social acceptability

Deployment

## ◆ Test Sites

### Expressway

Tomei, Shin Tomei, Joban,  
Tokyo Metropolitan Expressway  
Total length: approximately 300km

### Arterial roads

Tokyo waterfront city area

Test facility : Jtown  
JARI\* Test course  
New test facility for ADS  
(April 17, 2017 open)

(\*JARI : Japan Automotive Research Institute)

## ◆ Map for ADV

## ◆ Vehicle Position Detection

GNSS

Laser Scanner(LiDAR)

Radar

Camera

Sensed Data

Compare to estimate the position

High Definition 3D Map

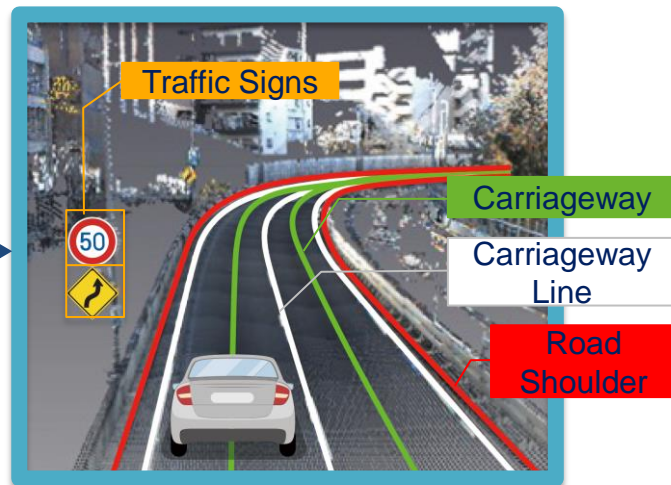

Traffic Signs

Carriageway

Carriageway Line

Road Shoulder

Traffic Signs

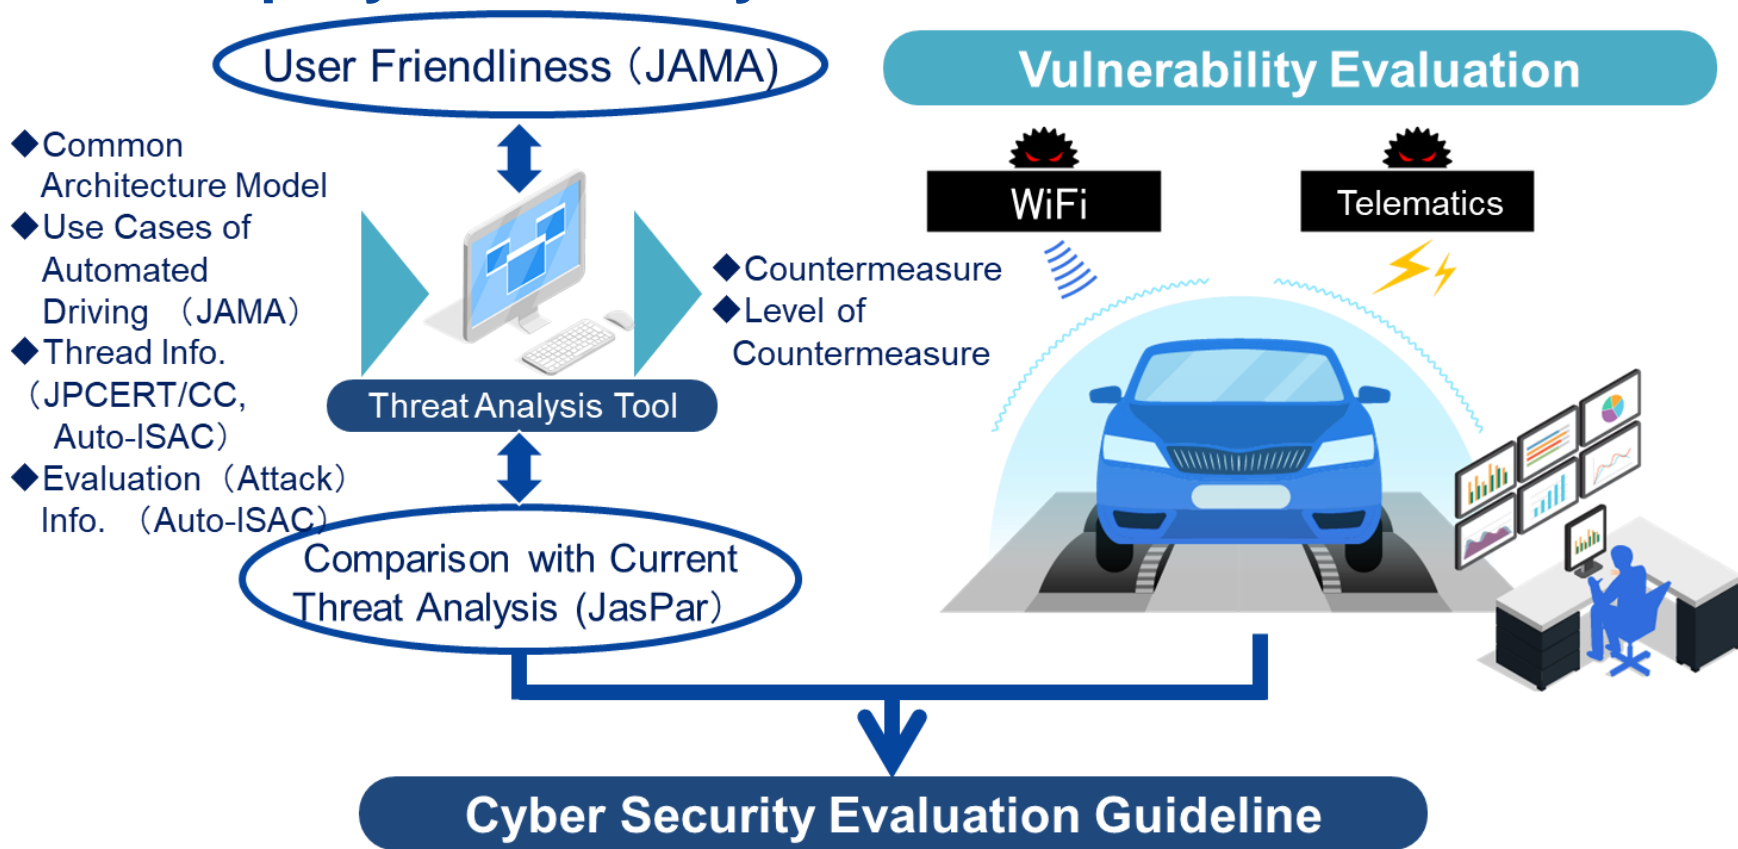

Carriageway

Carriageway Line

Road Shoulder

Estimate the position of the vehicle

# ◆ Develop Cyber Security Evaluation Guideline

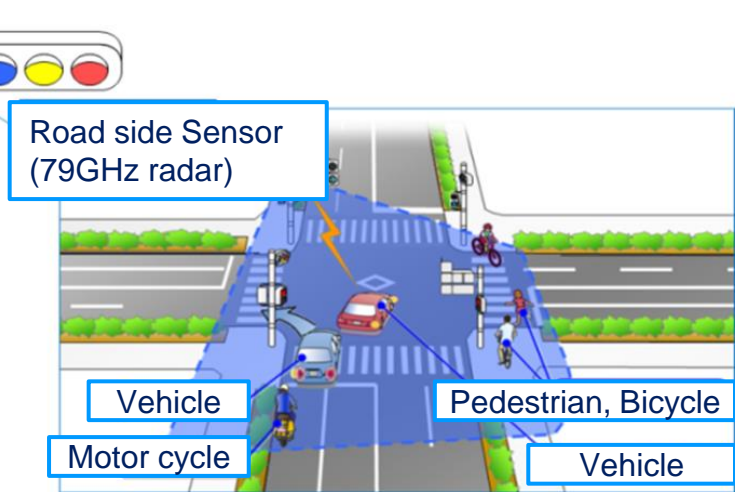

## ◆ Research on 3 interactions between AV/System and Human

## ◆ Mitigate Pedestrian Accidents using ITS Technologies

V2P with mobile device

79GHz radar

## ◆ New Urban Mobility for easy access

## ◆ FOT Schedule

## ◆ Dynamic Map Evaluation

- Validate 3D high-resolution digital map data
- Validate data collection and distribution method
- Verify the utility of semi dynamic information

- Map data Specification
- Accuracy

GNSS

Lidar

Camera

Millimeter wave Radar

Data Update  
Distribution

Utility of semi  
dynamic information

Traffic control  
Congestion  
Construction  
Dropping etc.

Dynamic Map Center

- Public Information
- Semi dynamic Information to Dynamic map via I2V

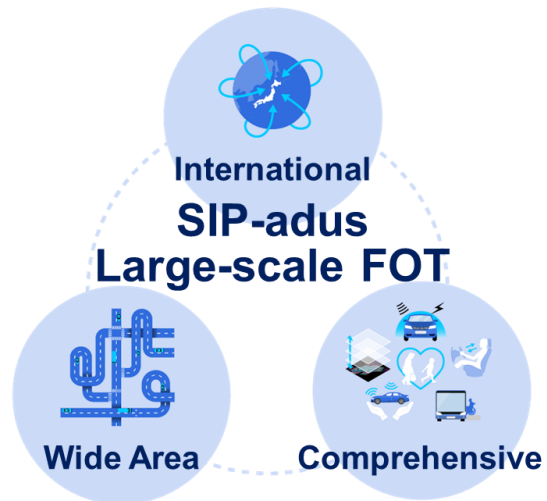

## ◆ Dynamic Map Evaluation

SIP-adus Dynamic Map

Prepare own test vehicles

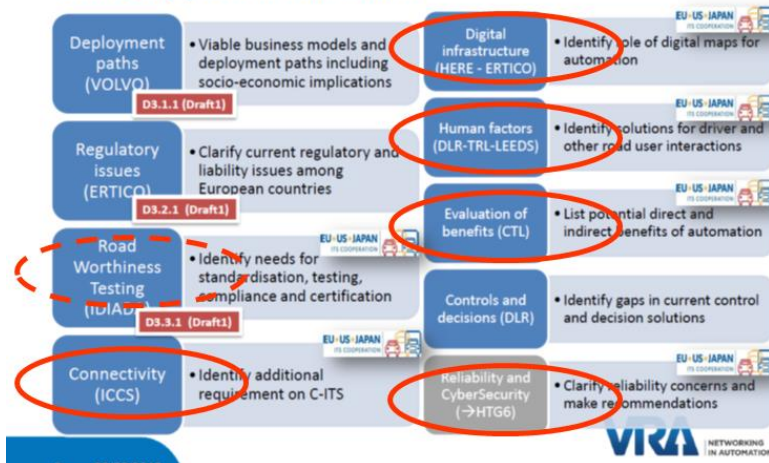

### Participants

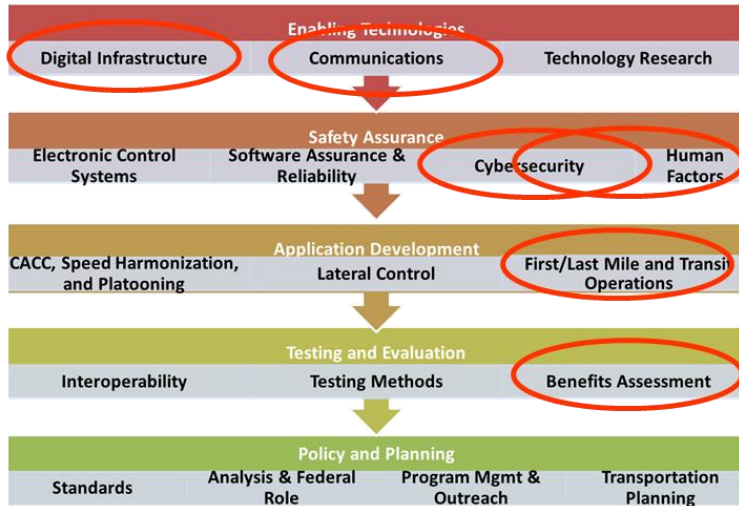

## ◆ Selected based on EU and US research agenda

1. Dynamic Map
2. Connected Vehicles
3. Human Factors
4. Impact Assessment
5. Next Generation Transport
6. Security

### Sub-WGs of the iMF Automation WG with support from VRA

Source : VRA

Source : USDOT

## ◆ Experts assigned in Focus areas

### Promoting Committee

System Implementation WG

Next Generation Urban Transportation WG

International Cooperation WG

1. Dynamic Map

2. Connected Vehicle

3. Human Factors

4. Impact Assessment

5. Next Generation Transport

6. Security

European Automobile Manufacturers Association

International Organization for Standardization

Innovation of Automated Driving for Universal Services

## ◆ V2V, V2I, V2P for ADV

Sensor for Vehicles and Pedestrians

Antenna

Onboard Display

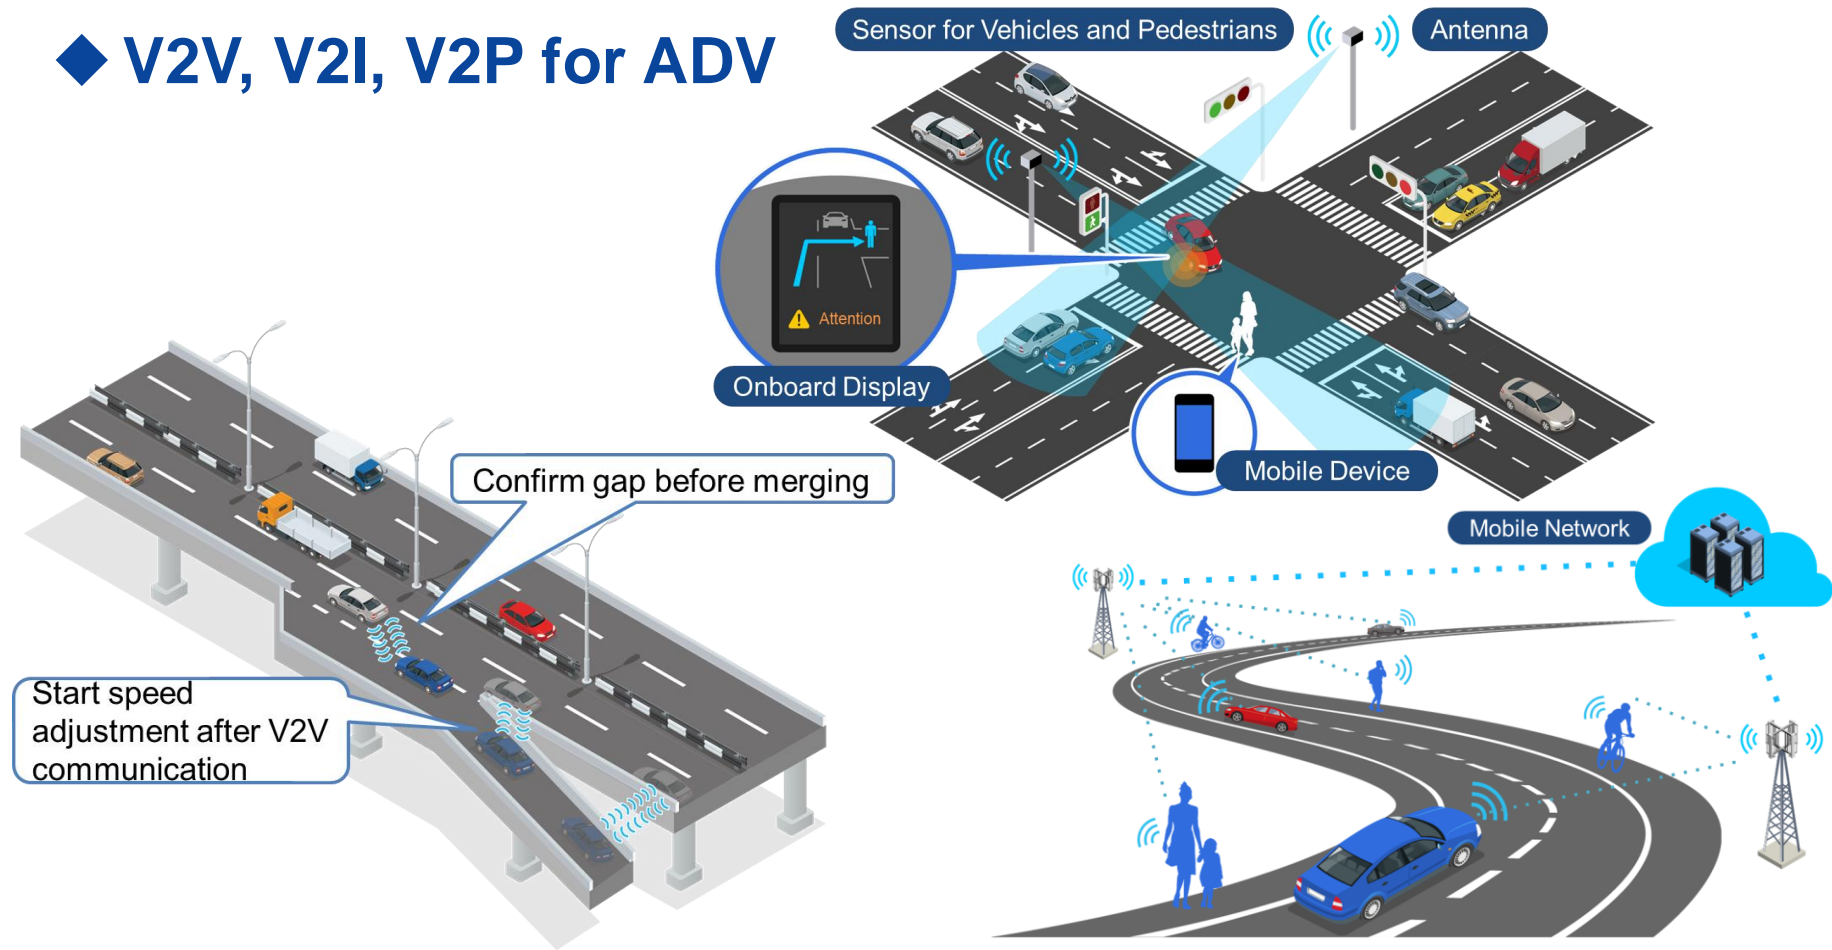

Mobile Device

Mobile Network

Confirm gap before merging

Start speed adjustment after V2V communication

## ◆ Quantitative Analysis of Accident Reduction

Real Traffic Flow Simulation

Traffic Accident Analysis

Effect Prediction

### Traffic accidents reduction simulation “Multi Agents”

Automated Driving Vehicle

[Simulation Parameters]

- Levels of Automation
- Diffusion of Automated Driving Vehicle
- Error Action(driver/pedestrian)
- Traffic Flow Density
- Number of Pedestrian etc.

Five major scenarios

Rear End

Lane Departure

Pedestrian Crossing

Crossing

Head-on

Collision Warning

Advanced Emergency Braking

Lane Departure Warning

Lane Keeping Assistance

Simulation result

Contributions by ADVs

- Number of
- Fatality
  - Severe Injury
  - Slight Injury
  - Near-Accident
  - Traffic Jam due to Accident
  - etc.

## ◆ Workshop on Connected and Automated Driving System

<http://www.sip-adus.jp/evt/workshop2017/>

- ◆ **Specialized International Conference on AD**
- ◆ **Sharing latest information, building friendship**
  - **Attendees : 425 from 17 countries**
  - **Speakers : Total 61, 34 speakers and moderators from overseas**

### Topics

1. Dynamic Map
2. Connected Vehicle
3. Human Factors
4. Impact Assessment
5. Next Generation Transport
6. Security

Speakers from overseas and  
**Minister Tsuruho**

## ◆ Plenary Sessions and Workshop

	Tuesday November 14	Wednesday November 15	Thursday November 16 (Breakout Workshop)
AM	9:00 ~ 10:00 Opening Session	9:00 ~ 10:30 SIP-adus Report Session	9:00 ~ 12:00 Breakout Workshop
	10:00 ~ 12:40 Regional Activities and FOTs	10:45 ~ 12:30 Impact Assessment	
	Poster Session		
PM	13:40 ~ 14:50 Dynamic Map	13:30 ~ 15:15 Next Generation Transport	13:00 ~ 15:00 Breakout Workshop
	15:00 ~ 16:40 Connected Vehicles		
	16:55 ~ 18:45 Security	15:30 ~ 18:00 Human Factors	15:30 ~ 17:15 Breakout Workshop Summary
	Preparatory Meeting for Breakout Workshop		17:15 ~ 17:45 Closing Session

## ◆ Breakout Workshop

Thursday November 16 (Breakout Workshop)	
AM	9:00 ~ 12:00 Breakout Workshop
	13:00 ~ 15:00 Breakout Workshop
PM	15:30 ~ 17:15 Breakout Workshop Summary
	17:15 ~ 17:45 Closing Session

Seven Breakout Workshops simultaneously

All Breakout Workshop attendees

**Breakout Workshop Summary**

◆ Opening Session

◆ Regional Activities and FOTs

 Dynamic Map

 Connected Vehicles

 Security

◆ SIP-adus Report Session

 Impact Assessment

 Next Generation Transport

 Human Factors

## ◆ Regional Activities and FOTs

- Status of each region
- FOT in each region
- Issues of FOTs
- International Cooperation to enhance deployment
- Guidance, Guidelines, Policies, Regulations, Harmonization, Standard, Ethics, etc.

Moderator

Sweden

VW/Pegasus/Germany

Roadworthiness/Spain

Renault/France

Aurora/Finland

Australia

Platooning/Netherlands

Tokyo 2020

## ◆ Discussions have initiated

FY2014 > FY2015 > FY2016 > FY2017 > FY2018 > FY2019 and beyond

◆ Development Structure  
◆ R & D Themes

**Promoting Committee**

- System Implementation WG
- Next Generation Transport WG
- International Cooperation WG

◆ Integrated into five major Topics

1. Dynamic Map 
2. Cyber Security 
3. HMI 
4. Pedestrian Accident Reduction 
5. Next Generation Transport 

◆ Large Scale Field Operational Test

-  Enhance Research and Technology Development
-  Evaluate from various viewpoints
-  Evaluate practical use
-  International cooperation and harmonization
-  Social acceptability

**POST  
SIP-adus**

**Thank you  
See you in Tokyo**
