### About MD communit, a traffic environment information portal site

The MD communit provides support to solve problems faced by users in data provision and service creation, and solves social issues and creates new services through data utilization.

**Digging up and providing public and private traffic environment information**

More than 5000 traffic environment information items are listed. You can make a realization of encounters with data that you did not notice through searching other than keyword searches, such as data recommendation for each user or similar data display by machine learning.

**Promote facilitates provider/user matching and support service creation**

We introduce companies that are likely to match the needs and seeds of users. We support the creation of services through encountering with companies that we did not know or had not been connected with before.

**Boost services with technical support such as data processing**

It is necessary to need support to sell data and develop services, but there could be some troubles. In such cases, MD communit provides technical support, including company introductions, to support the development of services.
